

Mira Intelligence™

A centralized data platform that increases safety and reduces cost.

Creating a safer path from manufacturer to patient

Mira Intelligence is a groundbreaking data integration solution that provides actionable insights to increase efficiency, accountability, compliance, and ROI across your facility. The interoperable system creates a consolidated experience for supply chain, compliance, and clinical leaders to proactively support informed decision making.

Mira Intelligence provides a real-time, centralized, end-to-end view of inventory and dispensing information to support truly integrated and synchronized medication and supply management. With Mira Intelligence, health systems can leverage powerful data insights to help reduce waste, cut costs, uncover diversion events, and ensure regulatory compliance.

Interoperable

Creates an interoperable system for clinical, compliance, and supply chain leaders to support proactive, precise decision making.

Centralized

Provides a centralized, end-to-end view of inventory so your providers have what they need, where they need it, when they need it.

Data Powered Insights

Leverages powerful data insights to help reduce waste, cut costs, uncover diversion events, and ensure regulatory compliance.

Analytics & Strategy

Turns analytics into business strategy so you can create efficiencies and improve effectiveness throughout your facility.

A smarter way to send medication in a safe direction

Mira Intelligence consolidates data from all medication inventory and dispensing locations. Health systems can leverage data and insights to aid forecasting and planning, inventory optimization, internal allocation, anomaly detection, and diversion prevention.

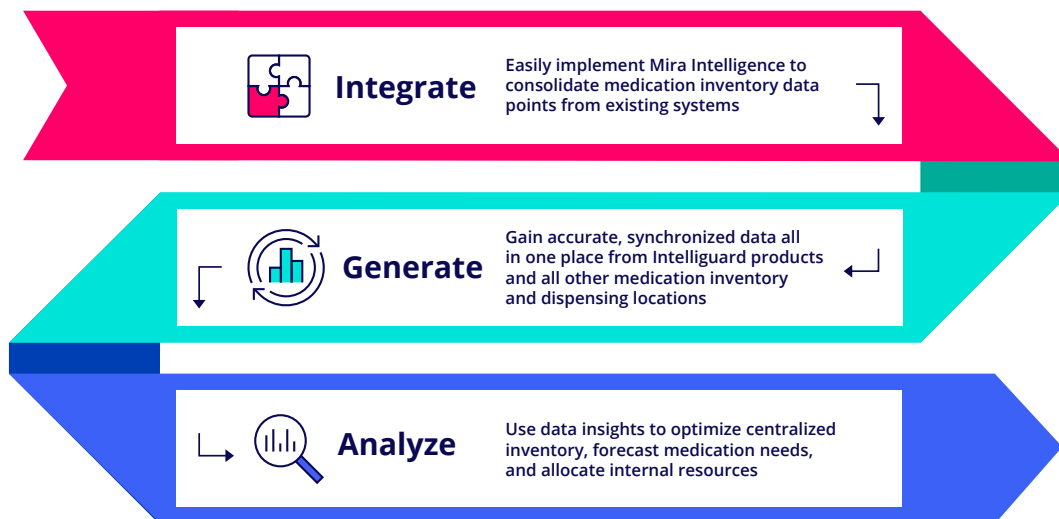

Optimize efficiencies, protect patients

Mira Intelligence promotes an environment of safety by pinpointing exactly where medications are located and how they're being used at every step of the medication journey. With seamless, real-time visibility and control, health systems can:

- Immediately identify which drugs are in short supply, recalled, or expiring
- Manage centralized distribution centers to safeguard against stock-outs
- Right-size inventory and optimize levels across locations
- Reconcile controlled substances and ensure compliance
- Reduce medication waste and improve cash flow
- Improve operational efficiencies and empower staff to practice at the top of their licenses

Easily implement data-driven operations in your hospital

Planning. Implementation. Configuration. Support.

Intelliguard makes implementation effortless by deploying clinical experts to support your team before, during and after the project.
