Intelliguard®

Mira Prep™
A fast, accurate, RFID-powered pharmacy automation system.

The Mira Prep Station uses gold-standard RFID technology to identify hundreds of medications in seconds and eliminate time-consuming manual workflows to prepare kits and trays. Hospital pharmacies can create an extended environment of safety using the Mira Prep Station to:

> Manage drug shortages
> Track medications with greater than 99% accuracy
> Reduce tray restocking time and automate daily workflows

> Identify expired and recalled medications
> Diminish the chances of drug diversions
> Improve pharmacy ROI

Automate your Pharmacy Workflows from Start to Finish
RFID tagging medications, kit and tray restocking, and data analysis are all optimized by the Mira Prep Station.

Encode
RFID-enable medications through the proprietary process of bulk encoding, or simply receive GS1-compliant source-tagged medications into your system.

Process
Check kits and trays for missing and expired medications and deploy verified trays for emergency use throughout the hospital, all with the touch of a button.

Track
Transform pharmacy inventory information into business intelligence using our centralized data platform.

Save nearly $100K per pharmacist per year[1]

Greater than 99% tracking accuracy[1]

63% improvement in anesthesia tray restocking[1]

GS1 Global Standards for RFID in healthcare

1. "Risk of Relying on Human Perfection" Case Study, 2015

The Power of Intelliguard's Gold-Standard RFID Technology

Scans high-density trays, multi-layer tackle boxes and any other kit or tray types - identifying hundreds of medications in seconds with over 99% accuracy.

The Mira Prep Station's RFID technology enables unprecedented accuracy and traceability across all medication profiles, from vials to syringes and from ampules to IV bags, allowing for increased control and visibility.

Easily restock medications with the Mira Prep Station

Scan
Insert tray to scan medications and easily identify missing, expired, or recalled drugs.

Restock
Refill kits and trays as specified on medication pick list.

Confirm
Re-scan tray to confirm 100% accuracy and completion.

Approve
Pharmacist reviews tray, approves, and prints tray detail report.

Planning. Implementation. Configuration. Support.

Intelliguard makes implementation effortless by deploying Certified Pharmacy Technicians and clinical experts to support your team before, during and after the project.

"The system is super easy to use, so we had buy-in right away and training our technicians and pharmacist colleagues was quick and easy!"

Arpit Mehta, PharmD, MPH
Pharmacy Operations Manager
Inova Fairfax Hospital
